Cone Sleeves

- Provide clear warning and safety messages
- Outdoor durable with UV-resistance
- Customize text and colors

Description

Brightly colored cone sleeves give clear warnings of works-in-progress, steering nearby people clear of potential dangers. Strong, boldly printed call-to-action messages on each cone sleeve can also help guide traffic, reduce confusion and help prevent accidents on the road near construction zones. These sleeves can be used indoors as well to help prevent injuries by signaling wet or slippery floors. Given the multi-functionality and ease of installation, Frick’s cone sleeves are definitely among the top choice for critical safety assurance.

Additional information

Weight	0.15 lbs
