

# JoistMate Attic Safety Platform

Reflective • Abrasion Resistant • Precision Cut Shapes

## Technical Data Sheet

Part: #WFS- ES-0038

### General Description

#### JoistMate® Attic Safety Platform

- High visibility and anti- skid surface
- Tested and certified to hold up to 700 pounds
- Securely fits either 16 or 24 inch on- center joist spacings
- Convenient shoulder strap

The JoistMate® attic safety platform is used by technicians to traverse wooden attic beams safely. Exposed wooden beams in many attics pose a safety threat and navigational challenge for anyone working in the attic. William Frick & Company developed the JoistMate® to create a safer work surface in such a place. Easily portable, the JoistMate® can be secured in place between either 16- inch OC (on center) or 24- inch OC joist spacings. The platform is made with three polycarbonate stabilizer bars underneath, which help keep the unit from moving and support a person's weight. A convenient shoulder strap is included for easy carrying.

#### Lightweight Sturdiness

Each 21.5 x 26.5 inch, lightweight and impact- resistant platform weighs only 10 pounds yet can support up to 700 pounds. This is the lightest attic platform on the market! High- visibility and high- friction striping ensure the user can readily see the boundaries of the platform, even in low- light conditions.

### Applications

Safety & Compliance, Construction

### Material Description

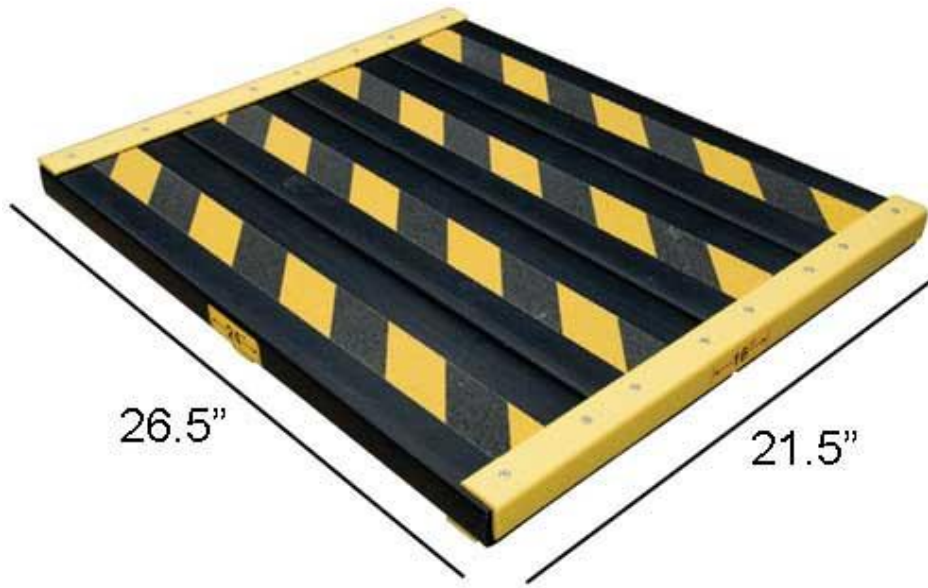

Custom colors available

#### Reinforced High- Strength Plastics

Size	21.5 x 26.5 x 2 inches
Weight	10.5 lbs
Service Temperature range	-40° F to 185° F
Available Colors	High Visibility Yellow and Black or Custom Colors

### Shelf life

Completely stable at room temperature

26.5"

21.5"

ALL DIMENSIONS ARE IN INCHES  
UNLESS OTHERWISE SPECIFIED

TOLERANCES

3 PLACE DECIMAL + OR-.005"

2 PLACE DECIMAL + OR-.02"

1 PLACE DECIMAL + OR-.1"
