Description

Help ensure social distancing with Frick's Anti-Slip Floor Labels. These slip-resistant labels are great for indoor applications where social distancing is a must. Their textured surface withstands foot and cart traffic, as well as maintains its non-slip properties when wet.

Anti-Slip Floor Labels' circular design allows them to last longer without peeling from constant foot traffic or floor cleanings.

These labels are great for retail stores, grocery stores, restaurants, hotels, hospitals, clinics, government buildings and airports to help customers and the community social distance by staying 6-feet apart from one another during this COVID-19 pandemic.

Custom messages, sizes, colors and graphics available.
