

Marking Flags

- Highly visible
- Wind and tear resistant
- Multiple flag and staff sizes available
- Custom print your logo and contact information

Description

Marking Flags are easily identified from a distance and increase communication for utility construction and line locating, pet containment, forestry, landscaping and lawn care applications.

These highly visible flags are APWA color coded and can be purchased blank or custom printed with your logo and contact information.

For even more visibility, Frick offers striped flags to stand out in heavily marked areas and printed reflective ink to enhance nighttime visibility.

Marking flags are wind and tear resistant and available in three sizes:

2" x 3"

4" x 5"

5" x 8"

Staffs are available in your choice of steel, plastic or fiberglass constructions in lengths of: 12", 15", 18", 21", 24", 30" and 36".

Biodegradable flags and staffs are available for a more environmentally friendly marking solution.
