

## RFID Laundry Tags

- Pre-print custom tags or print and encode on-site
- Heat, water, chemical and pressure-resistant
- Up to 11 ft. read range
- Attach via hem, stitch or heat-seal

## Description

Save time taking inventory and locating garments and tracking loss with the ability to read multiple tags at once from up to 11 feet away. Our durable and flexible RFID Laundry Tags withstand up to 300 wash and heat cycles of various dry cleaning, uniforms, linens, and other housekeeping items.

The RFID tags can be custom pre-printed with barcodes and variable data, or choose to encode the tags on-site\* using a thermal transfer printer. Their design allows them to be discreetly placed on items with a hem, stitch, or heat-seal with no pocket necessary.

Our RFID Laundry Tags are high-temperature, water, chemical and pressure resistant. These tags are great for the hospitality, hotel, hospital, laundry service and clothing rental industries.

\*Specific ribbon required for on-site printing. Enquire for more details.

## Additional information

Model Number	WF-SM-LAUNDRY RFID Laundry Tag
Applications	Identification Labeling, Asset Marking, Asset Tracking, High Temperature, Product Marking
Estimated Wash Cycles	75-300
Temperature Service Range	-40°F to 248°F
Water Resistance	Excellent
Solvents Resistance	Very Good
Shelf Life	Stored 77°F (25°C) in its original packaging, 1 Year

## RFID Performance

RFID Protocol	EPC Class 1 Gen 2
Tag Type	Passive Read/Write
Frequency Range	860 - 960 MHz (Global)
User Memory	512 bits
EPC Memory	96-480 bits
IC	Alien® Higgs® 3, NXP UCODE G2IL
